## SUMMARY

As a skilled WordPress developer with four years of hard work under my belt, I am deeply committed to creating websites that look great and work perfectly. My speciality is turning my clients' big ideas into strong, user-friendly WordPress themes and apps. I know how to use a wide range of important web tools, such as HTML, CSS, JavaScript, and PHP. My main areas of interest are front-end development and responsive design. I make sure that every job I work on not only meets but also exceeds expectations.

## EDUCATION

**Bachelor of Technology, India** – *Engineering*

**Post Graduate Technology, Canada** – *Computer Applications Development*

**Post Graduate Technology, Canada** – *Web Development & Internet Applications*

*Fundamentals*

## EXPERIENCE

**Gooder Marketing Inc. (Barrie, Canada)** – *Web Developer*

JAN 2023 - PRESENT

- I create custom WordPress themes and visually appealing websites from scratch, focusing on user-friendly design and extensive use of WordPress CMS, while also customizing themes to meet client specifications.
- I utilize a range of technologies, including CSS3, HTML5, jQuery, APIs, MySQL, SEO, and web-based animations to enhance website functionality and design, including database development.
- I adapt and customize themes and plugins from platforms like Themeforest, handle email marketing using tools like Mailchimp and Constant Contact, and provide regular work reports to the company.

**Adroitminds Software Labs (Trivandrum, India)** – *Software Engineer*

DEC 2020 - NOV 2022

- I designed and developed high-performance web applications, including the redevelopment and redesign of existing websites.

- I collaborated closely with business stakeholders to gather requirements and translate them into design documents, converting wireframes into user interface components and pages.
- I played a key role in daily scrum meetings, implementing data-driven UI/UX improvements that significantly boosted website conversion rates, resulting in increased sales and revenue.

## **Vantalogix Technologies Pvt Ltd (Trivandrum, India) – Front-end Developer**

NOV 2019 - NOV 2020

- I played a key role in designing and implementing components for seamless integration with both internal and external systems.
- I significantly enhanced application performance through comprehensive end-to-end testing, covering functionality, compatibility, and regression testing.
- I crafted user-friendly web and mobile applications, authored web pages, maintained websites, and ensured cross-browser consistency through CSS development.
